Quality Control

In every possible steps

Order execution and Quality Control :

Orders are closely monitored from sampling to shipment. Status on sampling, production and shipment are transmitted to buyers regularly. We maintain a pro-active approach towards identification of problem areas and corrective measures are taken immediately to ensure timely deliveries. Our quality monitoring system pertaining to production has four stages as explained below :

Pre Production Check (PPC)

Risks are reduced by checking material components at this stage itself.

Initial Production Check (IPC)

First finished products are checked against buyer's specification and prototype sample. Deviations are identified and brought out for correction.

During Production Check (DUPRO)

Inspection during production is carried out to check and verify that the initial discrepancies have been rectified and to ensure the average quality standard of production runs.

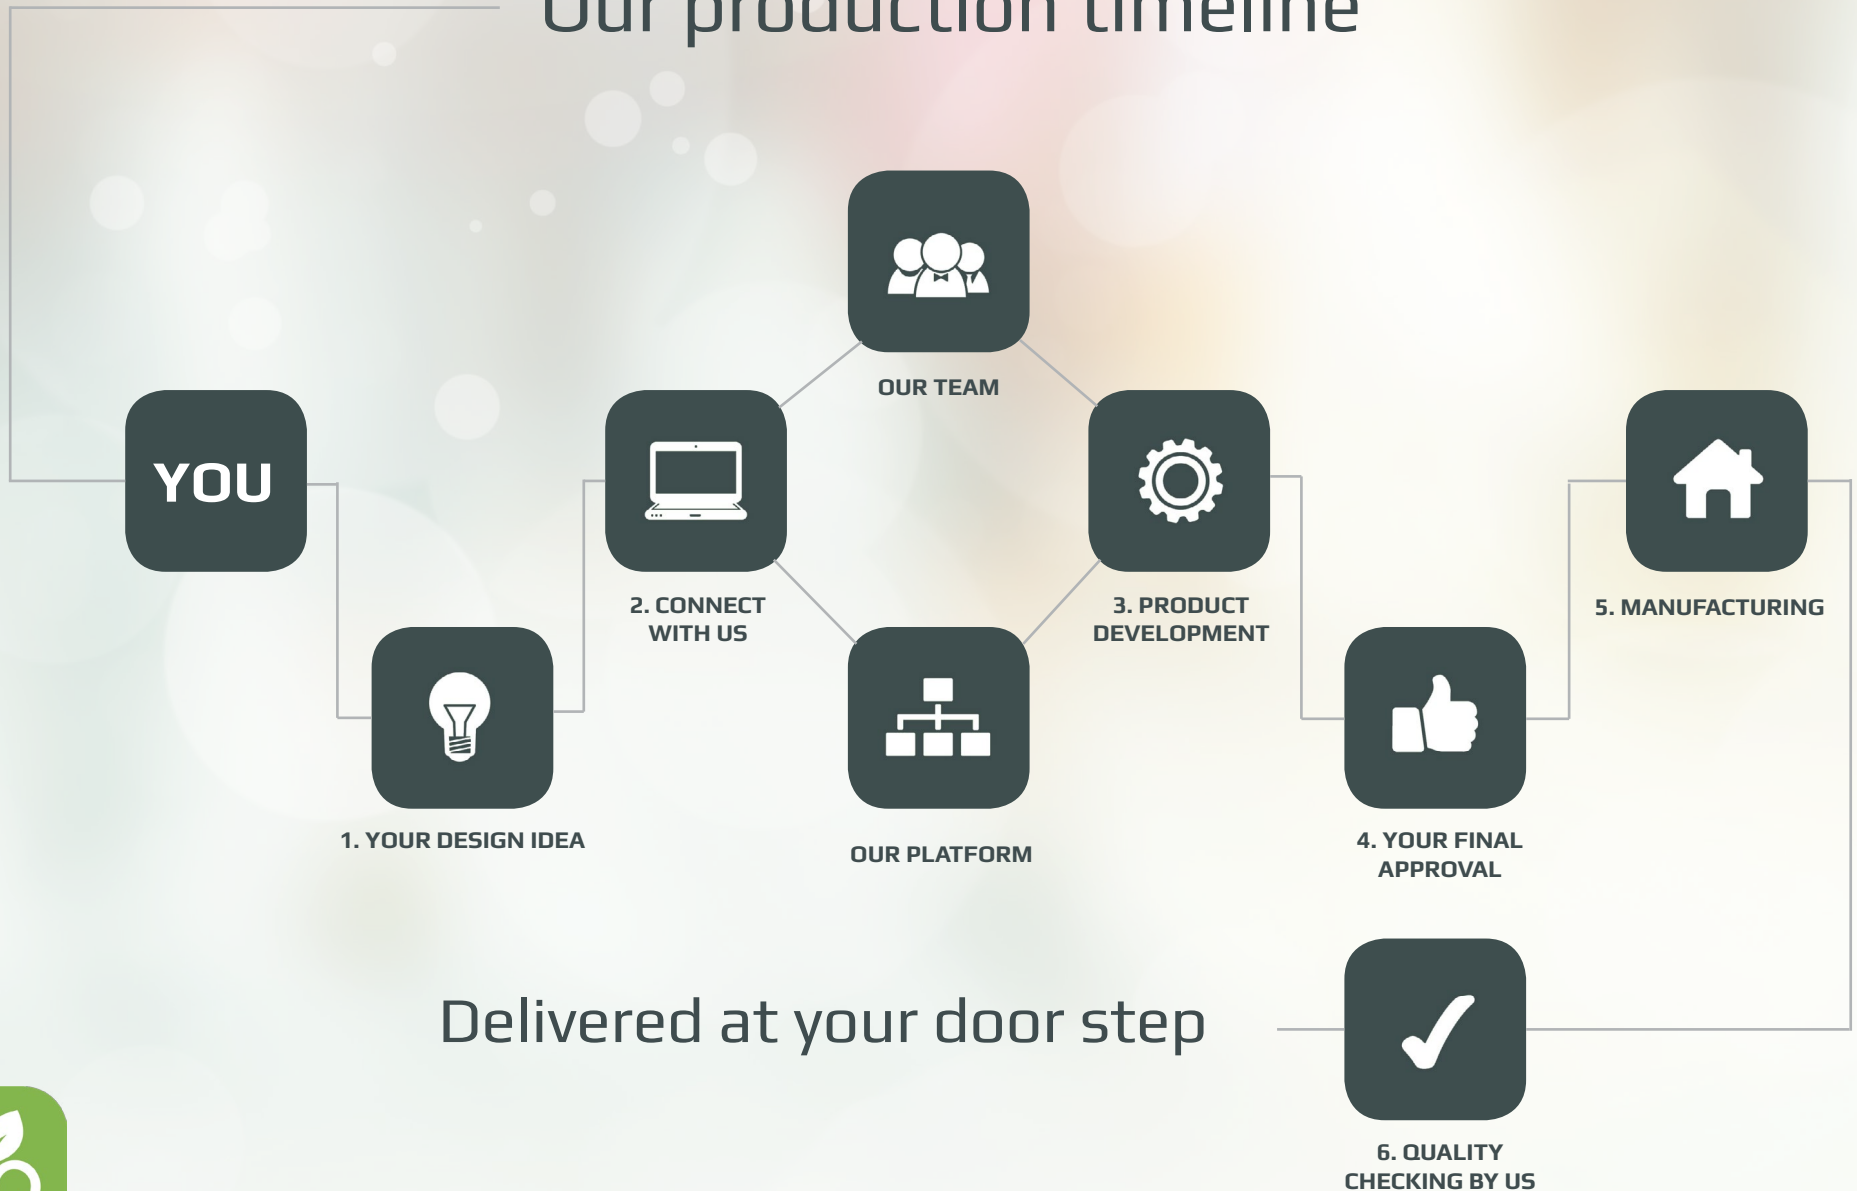

Final Random Inspection (FIR)

Final random inspection is carried out when the total consignment is packed and ready for shipment. FRI is performed according to the International Inspection Standards.

OUR SOLUTION

Our production timeline

Delivered at your door step

Our Services

SOURCING

With bonded warehouse facilities, our expert team source materials from specific manufacturer who are well known raw material manufacturer worldwide (Polyester Yarn- INDORAMA / Thailand, Rubber Thread - Rubber Flex / Malaysia, Spandex Rubber Thread- Creora/ Vietnam & Nylon Yarn- Acelon/ Taiwan) with a focus on efficiency and ethics. Our strong partnerships with suppliers are the key to a fast supply chain and ensure that we offer traceability of raw materials. We carry out site visits and welcome suppliers to our production facilities in return. We only work with manufacturer that are Oeko-Tex standard & ZDHC compliant and undertake our own assessments. Our suppliers are from near neighbour countries meaning we can offer both efficiency in transit and reduced carbon footprints per product. Keep regular stock 400MT to support production for next 3 months.

MANUFACTURING

We are specialists in premium garment accessories manufacture specially (Knitted Elastic – Jacquard Elastic – Woven Elastic – Fashionable Elastic) with an uncompromising focus on quality while seamless supply chain management and forwarding services make us cost effective. Our expertise combined with advanced machinery and technological capabilities means that we deliver the most technical products on the market. Our ability to manufacture multiple categories under one roof is unique. This combined with our strict ethical code is the reason we remain the first point of call for a loyal international client base of buyers.

QUALITY CONTROL

We strictly maintain **4M** technics skilled **MANPOWER** – right **METHOD** - high efficiency **MACHINE** – best **MATERIALS**, which primarily ensure quality product result. First off, quality assurance is not quality control, but quality control is an aspect of quality assurance. We build quality into each step of the manufacturing process including designing, production, and beyond. We understood as assessing for quality after products have already been manufactured and sorted into acceptable and unacceptable categories. Our products are assessed for quality in the preproduction phase, during production, and with a final inspection after the product has been completed.

CUSTOMER SUPPORT

We, at Green Pac (BD) Ltd. keep ourselves abreast with the changes in the fashion and apparel industry and we have designed our services for the clients in a systematic manner so as to respond within a clearly specified time frame with solution. That's CS slogan **"Happy to help!"**
